Letter Recognition: From Perception to Representation: A Special Issue of Cognitive Neuropsychology (Hardback)
LETTER RECOGNITION:
FROM PERCEPTION TO
REPRESENTATION

Edited by
MATTHEW FINKBEINER
and
MAX COLTHEART

A special issue of the journal
COGNITIVE
NEUROPSYCHOLOGY

Filesize: 4.34 MB

Reviews

The publication is easy in read through preferable to fully grasp. It is writter in simple phrases instead of hard to understand. You will not sense monotony at at any moment of your respective time (that's what catalogs are for concerning if you request me).
(Kevin Bergstrom Sr.)

LETTER RECOGNITION: FROM PERCEPTION TO REPRESENTATION: A SPECIAL ISSUE OF COGNITIVE NEUROPSYCHOLOGY (HARDBACK)

Taylor & Francis Ltd, United Kingdom, 2009. Hardback. Condition: New. Language: English. Brand new Book. Detailed computational modelling of reading has been much pursued in the past twenty years, and several specific computational models of visual word recognition and reading aloud have been developed. These models offer computational accounts of many aspects of reading, but all have neglected the front end of the reading process, saying essentially nothing about how early visual processes operate during reading and little about how the nature of letter representations and how these are activated from print. This volume aims to begin to redress this neglect of the front end of the reading system.The first three articles address issues of letter perception: i.e. how letter representations are activated from their visual features. The remaining four articles address the nature of the letter representations themselves, from functional, developmental and neural perspectives. These articles introduce novel and interesting ways to investigate the very earliest stages of the reading process. The research reported here will stimulate future investigations of this highly tractable, yet long overlooked, area of reading research. In particular, it should assist attempts to develop computational models of reading to make more realistic proposals about the actual computations involved in the activation of letter representations from print.
